

To Whom It May Concern:

September 22, 2008

I am writing this letter on behalf of Mark Estes and Jim Chase of JM Gemini Inc. I have been using their proprietary software program, SIMPLE, since February of this year to assist me in running my operation.

I have found the program to be invaluable in aiding my staff and myself in doing estimating, processing jobs, projecting revenue, and billing. Here are the things I like best:

- Writing estimates in quick, accurate, and clean fashion.
- Creating a daily work-flow for my production manager that insures all jobs will be done in a timely manner and no details are missed
- The ability to export all work orders into Quick books makes invoicing a breeze, as all line items are transferred from the SIMPLE program right into the invoice for each client.

Like any software program, there are a few glitches from time to time. On the few occasions this has happened I have had quick responses (within an hour) from either Jim or Mark and the problem has been resolved quickly, getting me back up and running the same day.

If you are looking to improve your efficiency, accuracy, and overall streamline your operation you can not go wrong by using this program. I would never go back to my "old" system, which I thought worked fairly well, after using this program.

Please phone or e-mail if you have any questions.

Regards,

Larry Goldstein
